

I 2002-2003 FUNDING FOR SPECIALIZED BOOKS, MATERIALS AND EQUIPMENT FOR LOW INCIDENCE STUDENTS

Summary of Legal Requirements

Education Code Section 56836.22 provides for funds to purchase specialized books, materials, and equipment as required under the individualized education program (IEP) for each pupil with low incidence disabilities as defined in Section 56026.5 ("hearing impairments, vision impairments, severe orthopedic impairments, or any combination thereof").

Funding is determined by dividing the total number of pupils in California with low incidence disabilities, as reported in the December 1, 2001 unduplicated pupil count, in the following categories: hard of hearing, deaf, visually impaired, orthopedically impaired, and deaf-blind of the prior fiscal year (**30,175**), into the annual appropriation provided for this purpose in the Budget Act + including a 2.0% COLA (**\$11,045,580**), resulting in a per pupil entitlement of (**\$366.05 per pupil**). The Budget Act for fiscal year 2002-2003 allows this funding to be used only "for purchase, repair and inventory maintenance" for equipment, materials and specialized books used by students with low incidence disabilities.

As a condition of receiving these funds, "the responsible local agency shall ensure that the appropriate books, materials, and equipment are purchased, the use of the equipment is coordinated as necessary, and that the books, materials, and equipment are reassigned to local education agencies (LEAs) within the SELPA once the agency that originally received the books, materials, and equipment no longer needs them."

It is also the "intent of the Legislature that local plan areas share unused low incidence books, materials, and equipment with neighboring special education local plan areas." If the equipment, materials or specialized books are no longer needed within the special education local plan area (SELPA) or a neighboring SELPA, the California Department of Education (CDE) Low Incidence Program Consultant shall be contacted to reassign the resources elsewhere within California. Items purchased with these funds may only be used by students with low incidence disabilities, unless a waiver has been approved by the State Board of Education.

Existing law (Education Code 56822) provides that "sound recordings, large print, and Braille books purchased, instructional materials transcribed from regular print into special media, and special supplies and equipment purchased for individuals with exceptional needs for which state or federal funds were allowed, are property of the state, and shall be available for use by individuals with exceptional needs throughout the state as the board shall provide."

Education Code Section 56320(g) requires that:

"The assessment of a pupil, including the assessment of a pupil with a suspected low incidence disability, shall be conducted by persons knowledgeable of that disability. Special attention shall be given to the unique educational needs, including, but not limited to, skills and the need for specialized services, materials, and equipment consistent with guidelines established pursuant to Section 56136." (See also Section 44265.5 cited on page 5.)

Education Code Section 56327(h) states, "The personnel who assess the pupil shall prepare a written report, or reports, as appropriate, of the results of each assessment. The report shall include, but not be limited to, all of the following:

"The need for specialized services, materials, and equipment for pupils with low incidence disabilities consistent with guidelines established pursuant to Section 56136."

Education Code Section 56345(b)(5) states, "When appropriate, the individualized educational program shall also include....:

For pupils with low incidence disabilities, specialized services, materials, and equipment, consistent with guidelines established pursuant to Section 56136."

Section 56136 of the Education Code requires the Superintendent of Public Instruction to "develop guidelines for each low incidence disability area and provide technical assistance to parents, teachers, and administrators regarding the implementation of the guidelines."

Education Code Section 56201 states, "As a part of the local plan submitted pursuant to Section 56200, each SELPA shall describe how specialized equipment and services will be distributed within the local plan area in a manner that minimizes the necessity to serve pupils in isolated sites and maximizes the opportunities to serve pupils in the least restrictive environment."

The Individuals with Disabilities Education Act (IDEA) now requires that the IEP team shall "consider whether the child requires assistive technology devices and services" for all students with disabilities. New IEP requirements also include the need, as appropriate, for "...Braille" for students who are "blind or visually impaired", and "language and communication needs..." "for students who are "deaf or hard of hearing. The Special Education Division's website contains a memorandum regarding assistive technology, and details on these, and other of the changes in federal and state requirements resulting from reauthorization of IDEA, AB 602, and other legislation.

Since the use of these funds is limited to books, materials, and equipment, for students with low incidence disabilities, the purchase must relate to the unique educational needs resulting from the low incidence disability as indicated in the IEP of eligible students. For example, regular textbooks and workbooks would not qualify in contrast to low vision aids, digital media, large print or Braille books for students who are visually impaired. Bolsters and mats for young children should be a part of basic equipment and would not qualify, while specialized adapted feeding and self-care equipment, needed by children because of their severe orthopedic impairments, would qualify. It is therefore important that specialized teachers who are credentialed to serve students with specific low incidence disabilities be involved in the team assessment process and be at IEP meetings. That will assure that books, materials and equipment considered for purchase for low incidence students are related directly to the unique educational needs resulting from a low incidence disability.

It is permissible to "pool" funds to be used by one or more students with low incidence disabilities, and there is no legal limitation on the amount of funding for any particular student.

Since there may not be adequate funding in FY 2002-2003 for all students, responsible local agencies should establish a priority for the allocating of these funds, using procedures outlined in the SELPAs local plan for special education.

These funds may not be used for staff development. Therefore, it is suggested that technical support and training be included when equipment is purchased. SELPAs are encouraged to collaboratively develop regionalized multi-agency funded centers that can provide ongoing technical support, training and address other activities and assure funds are used in the most cost-effective manner.

These funds may not be used to purchase medical therapy units for California Children's Services. LEAs shall provide necessary space and equipment for the provision of occupational therapy and physical therapy in the most efficient and effective manner.

These funds may not be used to purchase medical equipment needed for providing specialized health needs since California Code of Regulations, Title 5, Section 3051.12(b)(3)(c), states that "the school district shall not be required to purchase medical equipment for an individual student."

These funds may not be used to construct or alter facilities (for example, building ramps), or to acquire storage units.

Books, materials and equipment for low incidence students may be used by students with low incidence disabilities enrolled by the public school in non-public and private schools, or in the student's home, when required under the IEP, pursuant to SELPA local plan policies and procedures. Reasonable care must be provided, however, to prevent damage, loss or theft.

Funds are to be used only to supplement, and not to supplant other available funding for books, materials and equipment provided through the base program for general education and/or special education students. (e.g., basic computers or other basic technology should not be purchased with low incidence funds unless it can clearly be determined to fulfill a specialized function, format or adaptation directly related to the low incidence disability). General education and other special education funding should be used for purchasing these basic items. Funds are not to be used to supplant books, equipment and materials that have been provided by other agencies.

Please note that purchasing specialized equipment and materials for infants with low incidence disabilities is also an allowable expenditure for Part C (formerly part H) funds.

Since use of these funds is limited, "for purchase, repair and inventory maintenance" for equipment, materials and specialized books used by students with low incidence disabilities, any "coordinating" activity necessary to allow for the tracking of books, materials and equipment for students with low incidence disabilities must come from low incidence funds for specialized services.

The Low Incidence Program Consultant and the Clearinghouse for Specialized Media and Technology (CSMT) can assist and advise SELPAs or LEAs in reassigning surplus materials and equipment statewide or disposing of unusable surplus items. If you have any

questions or need assistance in this area, please contact:

Dennis Kelleher, Ed.D, Consultant

Deaf-Blind	Dennis Kelleher	(916) 327-0842
Deaf/Hard of Hearing	Nancy Grosz Sager	(916) 327-3868
Regionalization	Nancy Grosz Sager	(916) 327-3868
	Dennis Kelleher	(916) 327-0842
Severe Orthopedic Impairments	Dennis Kelleher	(916) 327-0842
Visual Impairments	Dennis Kelleher	(916) 327-0842

IMPORTANT NOTE: Since funding for the provision of funding for low incidence books, materials and equipment through California Education Code 56836.22 is State funds, unused portions of this money may be carried over. State funds for low incidence books, materials and equipment may not be commingled with Federal funds allocated for providing specialized services to students with low incidence disabilities.

II FUNDING FOR SPECIALIZED SERVICES FOR STUDENTS WITH LOW INCIDENCE DISABILITIES

Summary of Legal Requirements

The Budget Act for FY 2002-2003 appropriates \$1,700,000, which shall be used to provide specialized services to pupils with low incidence disabilities, as defined in Section 56026.5 ("hearing impairments, vision impairments, severe orthopedic impairments, or any combination thereof.")

Education Code Section 56320(g) requires that:

The assessment of a pupil, including the assessment of a pupil with a suspected low incidence disability, shall be conducted by persons knowledgeable of that disability. Special attention shall be given to the unique educational needs, including, but not limited to, skills and the need for specialized services, materials and equipment consistent with guidelines established pursuant to Section 56136."

Education Code Section 56327(h) states, "The personnel who assess the pupil shall prepare a written report, or reports, as appropriate, of the results of each assessment. The report shall include, but not be limited to, all the following:

The need of specialized services, materials and equipment for pupils with low incidence disabilities consistent with guidelines established pursuant to Section 56136."

Education Code Section 56345(b)(5) states, "When appropriate, the individualized education program shall also include...."

For pupils with low incidence disabilities, specialized services, materials and equipment, consistent with guidelines established pursuant to Section 56136."

Education Code Section 56136 requires the Superintendent of Public Instruction to "develop guidelines for each low incidence disability area, and provide technical assistance to parents, teachers, and administrators regarding the implementation of the guidelines. The guidelines shall clarify the identification, assessment, planning of, and the provision of specialized services to pupils with low incidence disabilities."

Education Code Section 44265.5 outlines credential requirements for specialized teachers serving students with low incidence disabilities:

- (a) Pupils who are visually impaired, as defined in Section 56350, shall be taught by teachers whose professional preparation and credential authorization are specific to that disabling condition.
- (b) Pupils who are deaf or hard of hearing shall be taught by teachers whose professional preparation and credential authorization are specific to that disabling condition.
- (c) Pupils who are orthopedically disabled shall be taught by teachers whose professional preparation and credential authorization are specific to that disabling condition.

Education Code Section 56363(b)(16) states the Designated Instruction and Services (DIS) "may include but not be limited to:

Specialized services for low incidence disabilities, such as readers, transcribers, and vision and hearing services."

These services are further defined in California Code of Regulations, Title 5, Section 3051.16:

"Specialized Services for low incidence disabilities may include:

(b) Specialized services related to the unique needs of pupils with low incidence disabilities provided by qualified individuals such as interpreters, notetakers, readers, transcribers, and other individuals who provide specialized materials and equipment."

Education Code Section 56201 states, "As a part of the local plan submitted pursuant to Section 56200, each SELPA shall describe how specialized equipment and services will be distributed within the local plan area in a manner that minimizes the necessity to serve pupils in isolated areas and maximizes the opportunities to serve pupils in the least restrictive environments."

Individuals with Disabilities Education Act (IDEA) now requires that the IEP team, "consider whether the child requires assistive technology devices and services" for all students with disabilities, as well as other requirements. The Special Education Division's website contains a memorandum regarding assistive technology, and details on these, and other of the changes in federal and state requirements resulting from reauthorization of IDEA, AB 602, and other legislation.

GUIDELINES - Specialized Services

- **Eligibility**

Funds may be used for all pupils with low incidence disabilities (ages 0-21) as defined in law, even though they may have been counted in another category in the pupil count. For example, a pupil who is deaf and also developmentally delayed would still be eligible even if the pupil was reported in the latter category or as multihandicapped. Also, some pupils counted as orthopedically handicapped may not be eligible because they are not "severely orthopedically handicapped" as per the definition in Education Code Section 56026.5. Pupils with severe orthopedic impairments require highly specialized services, materials and equipment per Education Code Section 56000.5(b). Generally, a student with severe orthopedic impairment would have a medical diagnosis including significant gross motor, range of motion deficiencies.

- **Responsibility**

The SELPA has responsibility for the use of these funds, including accountability of how the funds are used. It is the responsibility of LEAs within the SELPA to

cooperate with the SELPA by providing the information needed for the proper administration of the funds.

- **Allocation of Funds**

SELPAs that serve 25 students or less who have low incidence disabilities will receive base funding of \$2000, plus \$32.48 per student. Such **SELPA**s are designated as “sparse” and are eligible to apply for additional funding to serve students with low incidence disabilities. **SELPA**s serving 26 students or more who have low incidence disabilities will receive base funding of \$5000, plus \$32.48 per pupil. The per-pupil allocation is computed by taking the budget amount of \$1,700,000, and subtracting 10%, (\$170,000). The \$170,000 is to be used for grants to sparse **SELPA**s. The remaining \$1,530,000 is divided by the total number of pupils in California with low incidence disabilities, as reported in the December 1, 2001(30,175) which yields a per pupil entitlement for 2002-2003 of \$32.48.

Sparse SELPAs that serve 25 or fewer students with low incidence disabilities may apply for the additional funds for low incidence specialized services through the attached application. Funds will be provided based on demonstrated need to the extent that funding is available. The funds are not entitlements, and the funding amounts may vary from year to year.

As stated above, the CDE will reserve **\$170,000** for low incidence specialized service grants to sparse **SELPA**s, in order to meet the special needs of the low incidence student population. Approved applications (form is attached) will be funded utilizing the following timeline and process:

- Applications, with the required documentation, must be received by the CDE by 4:00 PM **January 15, 2003.**
- Between January 16, and January 31, the completed applications will be reviewed by a panel of **SELPA**/Special Education administrators from non-sparse **SELPA**s and CDE staff.
- By February 15, award letters will be sent to the successful applicants

Following is a list of the **SELPA**s who are eligible to apply, based on the December, 2001 Low Incidence Pupil Count:

SELPA	PUPIL COUNT
Colusa County	22
Glenn County	19
Inyo County	11
Lassen County	16
Los Angeles County Juvenile Court Schools	3
Modoc County	7
Mono County	5
Plumas County	21
Sierra County	1
Trinity County	9

Use of Funds (All SELPAs)

The use of these funds is limited to low incidence specialized support services such as "interpreters, notetakers, readers, transcribers, and other individuals who provide specialized services to students with low incidence disabilities pursuant to Education Code Section 56026.5.

Services funded are limited to direct services to the pupil or pupils with low incidence disabilities, and cannot be used for services to staff, or for any other purpose

Since the use of these funds is limited to "specialized" services, they must relate to the unique educational needs resulting from the pupil's low incidence disability or disabilities. It is important that specialized teachers who are credentialed to serve students with specific low incidence disabilities be involved in the assessment process, as well as in IEP meetings. This will assure that specialized services are directly related to the unique educational needs of the student with the diagnosed low incidence disability or disabilities. Funds should not be used to provide services to meet general education needs provided through the base program.

Funds are to be used to supplement, and not to supplant existing services (i.e., funds are to be used for additional services beyond those funded by a unit or through the base program). Funds may not be used to supplant services that have been provided by another agency.

It is permissible to "pool" funds to be used by one or more pupils with low incidence disabilities. Since there may not be adequate funding to meet the needs of all pupils, SELPAs should establish a priority for the use of these funds.

Please note that purchasing specialized services for infants with low incidence disabilities is also an allowable expenditure for Part C (formerly Part H) funds. Services must relate to a documented need for the services in the IEP/assessment results for each pupil receiving the service, or services. Funds should, therefore, not be used to fund staff development.

Personnel providing services to meet the specialized health care needs related to a student's low incidence disability must meet the requirements of the California Code of Regulations, Title 5, Section 3051.12(b).

Guidelines for each low incidence disability, published by the California Department of Education, provide additional information pursuant to Education Code Section 56345(b)(5). These publications will be of assistance in providing specialized services. Prices and ordering information can be obtained from:

California Department of Education
Publication Sales
P.O. Box 271, Sacramento, California 95812-0271
Telephone: (916) 445-1260 or (800) 995-4099
<http://www.cde.ca.gov/publications/Pub.html>

It is recommended that regionalization be used to provide services to students with low

incidence disabilities, whenever possible. A report, titled Regionalization for Students with Low Incidence Disabilities, developed pursuant to ACR 55, provides information regarding the effectiveness of using regionalization. For a copy of this document, contact:

Resources in Special Education (RiSE)
Sonoma State University - CIHS
1801 E. Cotati Avenue, Rohnert Park, California 94928
(707) 664-4394, or FAX (707) 664-2417

For assistance in information relating to regionalization, please contact the CDE low incidence program consultant listed above.

IMPORTANT NOTE: Since funding for the provision of specialized services is through federal discretionary funds, it cannot be carried over or co-mingled with funding for low incidence books, materials and equipment.

**Application for Funding to Provide Specialized Services for SELPAs
Serving Less Than 26 Students with Low Incidence Disabilities 2002-03**

SELPA Contact Person
Address Telephone

Description of Service Needed	Staff FTE	Cost, Including Benefits	# of Pupils to Be Served	Low Incidence Disability
.....
.....
.....

On a separate attachment, please provide a narrative that describes the need for the services. Along with the narrative, include documentation to support student eligibility as determined by:

Assessment results, that include a statement as to the need for specialized services, pursuant to EC 56320(g), and 56327(h) and IEP documents that confirm the need for the specialized services requested in the application as required in EC 56136. **Submitted documents shall exclude any personally identifiable student information.**

Applications will be ranked on completeness, clarity and documented need. The higher ranked application will receive a higher prorated amount of requested funding.

Pursuant to EC 56201, and in the space provided, please reference the part of your local plan that describes how specialized equipment and services will be distributed within the local plan area that minimizes the necessity to serve pupils in isolated sites, and maximizes the opportunities to serve pupils in the least restrictive environment. Local Plan section_____ page number_____.

If this application is approved, is staff currently available to provide the services? Yes_____ No_____

If no, please include an explanation with your application, including a projected date as to when the staff will be available.

Signing this application certifies that the services being requested will be provided by qualified individuals, such as interpreters, notetakers, readers, transcribers, and other individuals who provide specialized materials and equipment, pursuant to the California Code of Regulations, Title 5, Section 3051.16.

I CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE.

SELPA Administrator

Date

To be considered application must be received by California Department of Education not later than 4:00 PM Wednesday January 15, 2003. Send to:
